

Power Strip Model Rubric

How your Power Strip Model assignment is graded

Part A: name the parts and their purposes. Part B: model the energy flow. Levels show depth of reasoning, not one right answer.

	Missing · 0%	Emerging · 55%	Approaching · 65%	Developing · 85%	Refining · 100%
Question 1 · Part A, Key Structures Identify the key parts and tell what each one does.	No parts named. P. 2	Only outside parts, no purposes. P. 2	One inside part, vague purposes. P. 3	Inside + outside parts, mostly clear purposes. P. 3	All parts named with purposes that tell the energy story. P. 4
Question 2 · Part B, Model Diagram Model how energy flows to power at least two devices.	No drawing. P. 5	Outside only, no energy path. P. 5	Source + one device, path incomplete. P. 6	Source to two devices, most labels, flow mostly clear. P. 7	Source branches to 2+ devices, all parts labeled, flow clear. P. 7
Missing · 0% No attempt at this part.	Emerging · 55% An attempt is there, but the skill is just starting.	Approaching · 65% The skill is partly there, with important pieces missing.	Developing · 85% The skill is mostly there, with a small gap left.	Refining · 100% The skill is clearly there, with complete and connected reasoning.
